

Dear **Dixie State University Student**,

Dixie State University is making available to you, a unique **dental benefit**, which can cover you, your dependents and family. There is **NO COST (premium)** to participate in the **Dental Benefit Program** and the participating dentists have agreed to an averaged **20% discount**. To participate, you will need to activate the attached **“Dental Benefit Card”**, which you must present at the time of service. To enroll and activate your card, scan this code, or go to **www.dentalbenefitprogram.com** and follow these instructions:

Step 1) Click on the **“Get Started No Cost”** button. Then, select the **“I have a benefit card with my Group ID#”** option.

Step 2) Using the Group ID # (**DX100**) located on the front of your card (sample card below), enter your registration information in the appropriate fields.

Step 3) Once activated, you will be assigned a **Patient ID#** that you should write down on your card, in the space provided. Be sure to print your name on your card as the **“Authorized Patient”**.

Step 4) You can immediately log into the site by entering your Group and Patient ID #s or return anytime and search for the participating dentists and view the discounted fee schedule by entering your Group ID# and Patient ID#.

Your dental benefit card can only be used at participating Dental Benefit Program dental practices. Payment arrangements must be made with the dentist at the time of service. The Dental Benefit Program is more cost effective than other dental benefit options, eliminating the limitations associated with dental insurance such as: deductibles, co-pays, exclusions, waiting periods and annual maximums.

Along with this valuable benefit, the **Dental Benefit Program** provides **free** (no set up fee or annual charges) **health savings accounts** to qualified and activated patients through the Bank of the Cascades. Health savings accounts are an easy way to budget and pay for dental work, rollover each year, and provide tax benefits for qualified patients. Once you have activated your Dental Benefit Program card, set up a free health savings account, at **www.dentalbenefitprogram.com**.

All of the participating dentists are proud to offer you the very best services at affordable prices. These practices offer all phases of dentistry including: cosmetics, implants, bridges, crowns, restorations, dentures, root canals, extractions, and teeth whitening, and the program includes dental specialists.

We hope you find this program of value and encourage you to use this dental benefit at a participating dentist of your choice.
